Art Unit: 1639

DETAILED ACTION

Responsive to communications entered 2/1/2007. Claims 1-10 are pending. Claims 6,9,10 are withdrawn. Claims 1-5,7,8 are under consideration.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

Applicant's election with traverse of the species of "steroids" in the reply filed on 6/8/2006 is again acknowledged; Claims 6,9,10 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

Priority

This application is a CON of 10/263,195 10/03/2002 (now ABN) which is a CON of 09/607,925 06/30/2000 (now ABN) which is a CON of PCT/SE98/02413 12/22/1998.

Claims 1-5,7,8 are rejected under 35 U.S.C. 102(b) as being anticipated by Bystrom et al (1993 JACS 115:2081-2083).

Claims 1-5,7 and 8 rejected under 35 U.S.C. 102(e) as being anticipated by Mosbach et al (US Patent 6255461).

Response to Arguments

Applicant argues not all elements are taught.

Art Unit: 1639

Applicant's arguments have been fully considered but they are not deemed persuasive for the following reasons.

Specifically, applicant argues see p4-6 (2/1/2007) none of Whitcombe et al, Bystrom et al or Mosbach et al teach a combinatorial library according to the definition set forward by Richard Twyman on the Human Genome Website at the Wellcome Trust Sanger Institute: "Combinatorial libraries are large collections of chemical compounds"

However, the office is not bound to a single hand-picked definition from the prior art, but rather to the broadest reasonable interpretation in view of the specification and prior art combined. Further, it is noted, a definition as to what constitutes a combinatorial library is not found the present specification.

Solely to rebut applicant's argument, the claimed subject matter is drawn to a "combinatorial library" of compounds; however, the term is used quite broadly in the art to mean "any ensemble of molecules" (e.g., see Janda, K. D. "Tagged versus untagged libraries: Methods for the generation and screening of combinatorial chemical libraries" PNAS USA November 1994, 91, 10779-10785, especially page 10779, column 1, last sentence, "In its purest form, a combinatorial chemical library can be defined as any ensemble of molecules"). As there is no specific definition of a library in Applicants' specification, any ensemble of molecules that reads on those set forth in the claims is deemed to be a library.

Additionally, in response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., large collections of chemical compounds) are not recited in the

rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
